Civil Designer

Yeats is a Consulting company providing services in civil, structural, water and infrastructure engineering, project delivery, approvals management and environmental science. Formed in 2006, the company's capabilities are rapidly growing and include preliminary planning, environmental assessments and approvals, feasibility analyses, detailed engineering design and major infrastructure works.

The company has offices in Brisbane, Melbourne, Gold Coast, Mackay and Gladstone. Yeats provides services to both private industry and Local and State Government across Queensland, Victoria and New South Wales.

We have an opportunity for a suitably experienced Civil Designer to join our Gladstone office.

The position is working primarily on projects in Central Queensland, with the opportunity for involvement on national or international projects as they arise. You will have excellent opportunities for career and professional development, working across a variety of projects, and interacting with many disciplines. So if you are interested in joining an experienced civil engineering team, who are dedicated to providing the best engineering solutions and client outcomes, then Yeats is the place for you.

Primary Functions

- Design and documentation of earthworks, roadworks, stormwater drainage, sewerage reticulation and water reticulation;
- Providing contract administration and superintendency services to meet the client needs;
- Preparation of tender documents and undertaking of tender assessment & review;
- Conduct site meetings with the contractor/client and prepare project progress reports;
- Identify non-conformances and take corrective and preventive action;
- Process and certification of contractor's progress claims including cost to complete summaries; and
- Consultation and liaison with the client, government agencies and consultant teams.

Qualifications

Tertiary qualifications in Civil Engineering.

Specific Skills and Experience

- Minimum 3 years experience in design and drafting of civil engineering projects;
- Knowledge and experience with 12D, AutoCAD, MS Office, PC Drains and/or Drains software packages;
- Knowledge and understanding of the Qld Dept of Main Roads and local authority design and construction guidelines & specifications; and
- Previous experience in undertaking the role as Site Superintendent would be an advantage but not essential.

Personal Competencies

- Ability to work in a team environment
- Excellent communication skills, both written and verbal
- Self motivated
- Demonstrate effective time management

A competitive salary package will be offered to the suitable applicant, based on qualifications, skills and experience.

Ideally applicants will have all of the skills and competencies above, but candidates who satisfy most of these requirements are still encouraged to apply.
